CIC 200™ BI-METAL HACKSAW BLADES VARI-PITCH TOOTH DESIGN

- Outperforms ordinary hacksaw blades
- For cutting common steels, stainless steel, cast iron, aluminum, brass, copper, inconel and other metals
- Super sharp tooth design assures easier starting and faster cutting
- Hard alloy back beam provides maximum strength and resistance to bending, twisting, binding and vibration
- Unique high-strength alloy teeth
- Flexible and shatter resistant for greater safety

P/N 421814
Teeth per inch: 18-14
Length: 12"
Cuts: 1/4" and thicker

P/N 422420
Teeth per inch: 24-20
Length: 12"
Cuts: 1/16" to 1/4" thick

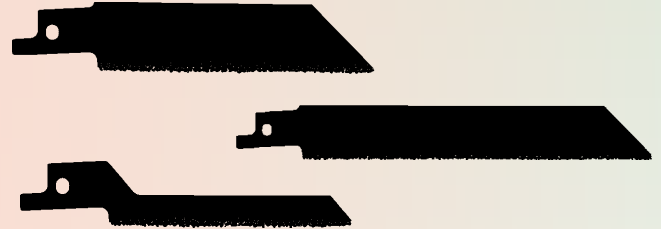

P/N 423226
Teeth per inch: 32-26
Length: 12"
Cuts: up to 1/16" thick

Special Price **\$3.50/ea.**

CIC 200™ TUNGSTEN CARBIDE EDGE SAW BLADES - RECIPROCATING - 1/2" UNIVERSAL SHANK

- Thousands of particles of tungsten carbide
- One of the hardest materials known to man
- Permanently bonded to tough alloy steel
- Forms a cutting edge of incomparable ability
- Will cut through the hardest of steels and most abrasive materials with ease

P/N 22740
Standard Blade
Length: 4"
Grit: Coarse

Special Price **\$11.65/ea.**

ANTI-FATIGUE MAT ALLEVIATES STRESS TO BACK & LEGS

Anti-fatigue mats alleviate stress to the back and legs where people have to continually stand or walk, which in turn increases worker productivity.

Non-slip surface means that the mat is ideal for use in wet or dry conditions to reduce slip hazards.

P/N 28229

Special Price **\$154.53/ea.**

- 3' x 5'
- Outstanding Anti-Fatigue qualities
- UV Stable
- Solid Nitrile Rubber top surface for excellent chemical resistance
- Textured Nitrile Rubber surface for superior slip resistance
- Welding Safe
- Closed-cell Nitrile/PVC cushion backing provides long lasting comfort
- 100% Nitrile Rubber border remains flexible for the life of the mat and will not crack or curl
- Closed-cell cushion backing is permanently molded to the Nitrile Rubber surface, providing a comfortable long lasting mat
- Thicknesses: 5/8"
- Available in black
- Certified slip-resistant by the National Floor Safety Institute
- Recommended for use in work stations, assembly lines, shipping lines and other areas where workers stand for extended periods

ANTI-SEIZE TAPE COPPER, NICKEL & CERAMIC

- 1/2" x 600" spool
- Easy to apply
- Discourages seizing, galling, carbon fusing
- Non-toxic, non-flammable, non-staining
- Inhibits corrosion, rusting, & pitting
- Will not rub off like greased based products
- Meets MIL specs: T-27730A (ASG) & A-A-58092

Copper: For cleaner high-temperature threaded anti-seize applications. Reduces required torque. Applied easily, seals tightly, overcomes high temperature seizing.

Temperature range: -450° to 1800°F

Nickel: For applications where copper cannot be used including chemical, extremely high temperatures, and harsher environments. Made specifically for stainless steel threads.

Temperature range: -450° to 2600°F

Ceramic: Formulated specifically for anti-seize applications typical to food industry. All materials FDA approved.

Temperature range: -450° to 2100°F

ALLIGATOR ANCHORS FLANGED

- Layout or hole-spotting is eliminated
- Can be drilled and set with fixture in place
- Works in any building material, concrete, brick, block, masonry, stucco, plaster, stone, tile, wood, drywall
- Works with different screw sizes for highest holding power without cracking wall
- Hold more than metal anchors 2X the diameter
- Manufactured of special corrosion-proof polymer that absorbs shock
- Can be used with screws of the same size diameter in high-strength substrates providing extreme heavy duty holding power
- Anti-rotation fins wedge the anchor in place to prevent sinking and spinning during installation
